

NINGALOO & THE BLUEWATER WONDERS OF AUSTRALIA'S WEST

This exciting voyage explores the remote coastal wonders of Western Australia on board the *Coral Discoverer*.

Join us as we visit the spectacular Rowley Shoals Marine Park, the Dampier Archipelago and the historic Montebello Islands. Your voyage will culminate with a visit to Ningaloo Reef, home to the gentle and giant whale sharks and manta rays. Our marine experts and guides will lead your discovery of the untouched atolls, mega marine fauna and rare bird species that are found in this pristine coastal habitat.

ITINERARY 12 NIGHTS BROOME TO BROOME

This is a flexible and remote area expedition. The itinerary will be adjusted to suit the tidal and weather conditions.

ROWLEY SHOALS

The shoals offer some of the best snorkelling and diving opportunities in the world. Conditions permitting, we will spend 1-2 days at Clerke, Mermaid or Imperieuse reefs for snorkelling and diving opportunities. Guided by our marine biologist, snorkel in the coral gardens of the Aquarium at Clerke Reef, or dive along the sheer vertical walls and through coral canyons. Try a drift snorkel, or beach comb on Bedwell Island, keeping an eye out for the red-tailed tropicbird.

MONTEBELLO ISLANDS

Spend a full day exploring this island group, with opportunities for swimming, snorkelling and birdwatching. Visit Champagne Bay and Turtle Lagoon. Discover Ground Zero of the atomic blast at Trimouille Island, and view the inscribed plinth there marking the site. Green, Hawksbill and flatback turtles are regularly seen here, as are whales and dolphins. The islands are an Important Bird Area, where fairy and roseate terns and sooty oystercatchers congregate.

MUIRON ISLANDS

The waters surrounding the uninhabited Muiron Islands are teeming with marine life. A variety of dive sites are on offer, including swim-throughs and ledges where nudibranchs, eels and angelfish hide. After in-water activities, stretch your legs on a stroll down the beach on these untouched islands.

DAMPIER ARCHIPELAGO

With our onboard naturalist and historian, explore the archipelago's pastoral, pearling and indigenous past that is still visible today in the form of ruins and petroglyphs. There will be ample opportunity to explore the area's historical and cultural sites before taking to the azure waters for snorkelling, kayaking and diving.

NINGALOO COAST & REEF

We will spend 2-3 days here exploring this stunning coastline from Exmouth to Coral Bay. Snorkel and dive the outer reefs and relax on stunning beaches such as Turquoise Bay. As we cruise the 'Humpback Highway' down the coast, you may see these majestic whales breach close by. Spend a day with an experienced local operator, with the chance to swim with some of the mega fauna this region is known for.

DEPUCH ISLAND

Explore Depuch Island's other-worldly volcanic landscape, of significant cultural value to the Ngaluma tribe. See unique geology and petroglyphs dating back thousands of years.

EXPEDITION HIGHLIGHTS

- > Snorkel & dive the pristine and rarely visited Rowley Shoals, accompanied by our Marine Biologist
- > See or swim with the megafauna of Ningaloo Reef (subject to nature)
- > Discover sites of cultural significance to Indigenous Australians and historic sites of European exploration
- > Visit Important Bird Areas on remote island groups
